

Organic Air Purification System

**100%
Natural
Organic**

**Deodorise, cleanse
and purify the air.
Cleanses all surfaces.**

- By decontaminating the air and surfaces with a biological process, this product brings a highly efficient and revolutionary solution which protects people and the environment.
- It is a complete organic decontaminating and deodorising system, thanks to an entirely plant based organic cleansing liquid solution.
- Unlike most decontaminating processes, this product is non-oxidant (air oxidation causes premature ageing of all living cells).
- It has taken 10 years of research to identify the combinations of components, dose them and test them.
To date, no known organic particle has been resistant to the product (virus, moulds, yeasts, bacteria : legionella bacteria, Koch bacillus, golden staphylococcus).
